

## **Broadridge (Deutschland) GmbH**

### **Description of WM interface:**

All WM data are stored in a relational data base. The daily change file in variable record format runs automatically into this data base, updates and historises the data.

Software for the processing of WM data

Apart from individual conceptions the following standard products are offered:

A security data base where all WM data can be stored.

An on-line application (OAS) to see all WM information on screen.

A date file (TeD), which filters all dates for the completion of corporate actions.
